A highly skilled professional with 10+ years of extensive experience in analyzing client requirements for validity and feasibility, and executing comprehensive research and development activities across a wide range of projects. Proficient in designing and developing Single Page Applications (SPAs) using ReactJS, AngularJS, Angular 5, and JavaScript, catering to diverse domains within the IT industry.

Recognized for excellent interpersonal and communication skills, contributing to effective collaboration and teamwork during project phases. Demonstrated abilities as an effective team player, adept at guiding and supporting team members while fostering a culture of knowledge sharing.

Passionate about staying updated with the latest advancements in technology, actively seeking opportunities to learn and master new and cutting-edge technologies. Committed to leveraging this passion to drive innovation and deliver outstanding results.

📁 Career Highlights

- 10+ years of experience in **Software Development**
- Good Experienced in various types of Software development like **front-end development, back-end development, and Browser extension development, Mobile app development** using **Flutter**.
- Strong experience in **Analyzing requirements** and finding approaches to fulfill those requirements.
- Worked on **Agile** methodology and participated in **scrum** meetings.
- Hands-on experience in developing **SPA** using **ReactJS, Angular 5+, AngularJS, and JavaScript**.
- Extensively worked on front-end **HTML, CSS, jQuery, AJAX**, and **MVC** architecture/ backend using **Node.js, Express.js, and MongoDB**.
- Skilled in front-end engineering using **Object-Oriented JavaScript** and **JSON**.
- Experience in developing **Browser extensions** for various browsers like **Chrome, Firefox, Safari, and IE**.
- Experience in working with **Firebase**, to **deploy websites, Authentication**(Google Auth, Email-Password), **Realtime Database, Firebase Store**, etc.
- Experience in using various tools like **Chrome Developer Tools, Firebug, AWS Lambda, Heroku Cloud services, Docker** for **NGINX**, **IDE's** such as **Visual Studio Code, Web Strom, Sublime, XCode**, and operating systems like **Linux – Ubuntu, MAC, and Windows**.
- Expertise in creating user **validation forms** and sending data to servers using **RESTful** services.
- Actively involved in the **Scrum meeting** to discuss project progress reports every day.
- Extensively used the repositories like **GIT, BitBucket, TFS**, etc.

Skills

- JavaScript
- Angular Material
- Node.js
- Dart
- ReactJS
- HTML
- Express.js
- Flutter
- Angular
- CSS
- Object Oriented JavaScript
- AngularJS
- JQuery
- Browser extension Development

Work Experience

Dec 2015 – Nov 2019
Pune, India

Web Developer
Coditude Private Limited

Projects:-

MailTag.io - Full-Stack Developer (April 2016 - Feb 2017)

Responsibilities:-

- Daily programming on the server and client side by using JavaScript and PHP.
- Worked on the Front end by using HTML, CSS, Bootstrap and JavaScript, and Browser Extension Development.
- Developing POCs to create a user interface in Bootstrap.
- Designing and developing the application using PHP (MVC) framework along with HTML5, CSS3, JavaScript, Bootstrap, JQuery, NPM, and PostgreSQL also worked on creating Web API and hosted on AWS instances using Docker.
- Working with Highcharts and HTML Editor (TinyMCE rich-text editor).
- Responsible for designing and developing the web pages from mock-ups (Sketch).
- Using JSON for data exchange between client and server.
- Handling cross-browser/platform compatibility issues (IE, Firefox, and Safari) on both Windows.
- I used Amazon SES, and Mail Chimp as ESP, and used Google Analytics, and Intercom for analyzing user data and internal communications.
- Used JIRA to keep track of bugs to reduce downtime, and increase productivity, and Communication.

UTM.io - MEAN Stack Developer (Feb 2017 - Nov 2019)

Responsibilities:-

- Taking requirements from the client and analyzing the requirements.
- Planning the development process and structure of code.
- Developing frontend components with the help of Angular, HTML, and CSS.
- Responsible for the design and development of the web pages from mock-ups (InVision).
- Developed Component Driven Architecture and rebased the UI of the application in Angular 5.
- Developing Back-end Using NodeJs, ExpressJs, and MongoDB.
- Working with Heroku for deploying the application and AWS Lambda for setting up auto-running tasks.
- Worked Extensively with Angular CLI for creating components, Services, pipes, and Directives.
- Designed and developed the application using Angular 5 framework along with HTML5, CSS3, TypeScript, JavaScript, jQuery, Bootstrap, Node.js, Express.js, NPM, Mongo DB, and used Heroku cloud for deployment.
- Integrated with Stripe as a 3rd party payment gateway.

- Used NPM for installing required node modules and other published Angular NPM modules.
- Used Segment, Amplitude for user data analytics Grow Sumo for marketing.
- Involved in agile software methodologies using TEST DRIVEN DEVELOPMENT (TDD) on Karma.
- Used Trello to keep track of bugs to reduce downtime, and increase productivity, and Communication.

Nov 2019 – Present
Pune, India

Sr. Software Developer

Vicon Industries Private Limited

Projects:-

Vicon VMS ☑ - Sr. Software Developer (Nov 2019 - Present)

Responsibilities:-

- Analyzing the requirements for development.
- Planning the development process and writing code that is scalable.
- Developing high-performing and Bug-free code using ReactJs, Redux, AngularJS, and JavaScript with backward compatibility.
- Responsible for making code optimized and increasing app performance.
- Integrating different 3rd party libraries like JQuery, JQueryUi, UiGrid, etc.
- Working with AngularJS, and JavaScript for creating Controllers, Services, Filters, and Directives.
- Developed high-performing single-page applications using AngularJS, JavaScript, and JQuery
